INTRODUCTION

This is the second release of the research paper Yukon Income Statistics. Data presented is generated by Statistics Canada, Small Area Data Division and is derived from Revenue Canada individual tax records. In contrast to Revenue Canada Locality data which is available at the census subdivision level this data is available by postal code.

This publication could be best described as a labour force income profile. Sources of income presented include total income, employment income, unemployment insurance benefits, self-employment income and labour force income. Data is presented at the community level and at the subdivision level within Whitehorse for the period 1982-1986. Data from the 1986 tax year is the most current available.

The reader will note that some communities have been grouped and in some cases data has been suppressed. It is Statistics Canada policy to suppress data when less than 100 taxfilers are involved or number reporting is less than 25.

DEFINITION OF TERMS

NUMBER OF TAXFILERS:	The total number of taxfilers in the Yukon.
TOTAL INCOME:	Total income is all income reported by taxfilers. It includes employment income, and other sources such as pension income, family allowance income, unemployment income, net rental income, dividend and interest income and any other income reported.
Number Reporting:	The total number of taxfilers with total income greater than zero.
Amount ($000)	The total amount of income reported in thousands of dollars.
Median ($):	The median total income.
EMPLOYMENT INCOME:	The sum of all income associated with employment. It includes the following income sources: T4 earnings (wages and salaries as reported by one or more employers); other employment income (e.g. tips and gratuities); net professional income; net business income; net commission income; net fishing income and net farming income.
Number Reporting:	The total number of taxfilers with employment income greater than zero.
Amount ($000):	The total amount of employment income reported in thousands of dollars calculated by summing the sources of income listed in Employment Income above.
Median ($000)	The median employment income.

Definition of Terms cont'd

SELF-EMPLOYMENT INCOME:	Self-employment income is the total income derived from the following sources: net professional income, net business income, net commission income, net farming income and net fishing income.
Number Reporting:	The total number of taxfilers with self-employment income greater than zero.
Amount ($000):	The total amount of net self-employment income.
LABOUR FORCE INCOME:	The sum of employment income (see Employment Income -Amount ($000)) and UI benefits (see UI Income - Amount ($000)). Note: Labour Force Income may not equal the sum of employment income and U.I. benefits due to independent random rounding.
Number Reporting:	The total number of taxfilers with labour force income greater than zero.
Amount ($000):	The total amount of labour force income reported in thousands of dollars.
UNEMPLOYMENT INSURANCE INCOME:	Total UI benefits reported in the calendar year for all reasons including retirement, maternity, sickness, fishing, and occupational training, as well as regular benefits.
Number Reporting:	Total number of taxfilers reporting UI benefits.
Amount ($000):	Total amount of UI benefits reported.
UI Dependency Ratio:	The ratio of UI benefits to employment income.
